Hydrometallurgy 36 (1994) 393–395

hydrometallurgy

Contents Vol. 36

Vol. 36 *No.* 1

Obituary v

A general shrinking-particle model for the chemical dissolution of crystalline forms
C. Núñez, J. Viñals, A. Roca and L. García-Soto 1
Carbon paste electrodes in mineral processing: an electrochemical study of sphalerite
E. Ahlberg and J. Ásbjörnsson 19
Flotation of powdered activated carbon with adsorbed gold(I)–thiourea complex
A.I. Zouboulis, K.A. Kydros and K.A. Matis 39
Extraction and separation of some 3d transition elements using Cyanex 925: application to zinc ores
S.K. Yadav, O.V. Singh and S.N. Tandon 53
The selective solvent extraction of cadmium by mixtures of carboxylic acids and trialkylphosphine sulphides. Part 1. The origin and scope of the synergistic effect.
J.S. Preston 61
Synthesis and characterisation of diamide extractants for the extraction of neodymium
Q. Tian and M.A. Hughes 79
Hydrometallurgical processing of Egyptian black shale of the Quseir-Safaga region
A.M. Amer 95
Application of binary extraction in hydrometallurgy
A.I. Kholkin, G.L. Pashkov, I.Yu. Fleitlikh, V.V. Belova, K.S. Luboshnikova, V.V. Sergeev, A.M. Kopanev and G.K. Kulmuhamedov 109

Meeting Announcements 127

Vol. 36 *No.* 2

Extraction studies of Zn(II), Cu(II) and Cd(II) with impregnated and Levextrel resins containing di(2-ethylhexyl)phosphoric acid (Lewatit 1026 Oc)
J.L. Cortina, N. Miralles, M. Aguilar and A.M. Sastre 131
The selective solvent extraction of cadmium by mixtures of carboxylic acids and trialkylphosphine sulphides. Part 2. Practical applications in the separation of cadmium from zinc and nickel
J.S. Preston, J.H. Patrick and G. Steinbach 143

0304-386X/94/$07.00 © 1994 Elsevier Science B.V. All rights reserved
SSDI 0304-386X

Extraction of uranium(VI) and uranium(IV) from hydrochloric acid using tri-n-octylamine in a benzene diluent
D.A. White and Fathurrachman 161
Bacterial oxidation conditions for gold extraction from Olympias refractory arsenical pyrite concentrate
M. Taxiarchou, K. Adam and A. Kontopoulos 169
Relations between the size distribution of a gold particle system and the leaching curve in cyanide solutions
L. Guzman, W. Yapu, J.M. Chimenos, M. Viladevall and F. Espiell 187
The effect of some surface active additives upon the quality of cathodic copper deposits during the electro-refining process
L. Mirkova, N. Petkova, I. Popova and St. Rashkov 201
Fractional factorial experiments in the development of manganese dioxide leaching by sucrose in sulphuric acid solutions
F. Veglio' and L. Toro 215
Solid–liquid mass transfer in the presence of micro-particles during dissolution of iron in a mechanically agitated contactor
K.S. Geetha and G.D. Surender 231
Kinetics and mechanism of leaching of low-quality boehmite bauxite with hydrochloric acid
Ž.D. Živković and N.D. Štrbac 247

Technical Note
Dissolution kinetics of calcined colemanite in ammonium chloride solution
C. Kum, M. Alkan and M. Muhtar Kocakerim 259

Meeting Announcements 267

Vol. 36 *No.* 3

Effect of some common impurities on mass transfer coefficient and deposit quality during copper electrowinning
T. Subbaiah and S.C. Das 271
A general shrinking-particle model for the chemical dissolution of all types of cylinders and discs
C. Núñez, M. Cruells and L. García-Soto 285
Electrowinning of metals using buffered sodium chloride electrolyte during electrochlorination of sea nodules
R.K. Jana, D.D.N. Singh and S.K. Roy 295
The mechanism of extraction of HNO_3 and neodymium with diamides
Q. Tian and M.A. Hughes 315
Pressure reduction of nickel(II) with hydrogen from aqueous acetate solutions containing aluminum powder
J. Wódka and W.A. Charewicz 331
Leaching of nickel and iron from Greek non-sulphide nickeliferous ores by organic acids
P.G. Tzeferis and S. Agatzini-Leonardou 345
The role of protective alkalinity and Ca^{2+} ions in the cyanidation of refractory silver ores
N. Acarkan, V. Gürkan and F. Arslan 361

The phosphine oxides Cyanex 923 and Cyanex 925 as extractants for gold(I) cyanide aqueous solutions
F.J. Alguacil, C. Caravaca, S. Martínez and A. Cobo 369

Technical Note
Adsorption studies of gold on copper sulphide
M. Sarwar and S. Naeem 385

Contents Volume 36 393
